1 // # Chapter Four
2 /*****
3  # Loops are handy, if you want to run the same code over and over again,
4    each time with a different value.
5
6  # Loops are Statements Which Execute Some Block of Code
7    Repeatedly until The Condition Becomes False
8
9  # There are Mainly Three Types of Loops:
10      1. For Loop
11      2. While Loop
12      3. Do While Loop
13
14      As a Beginner
15        (Loops & Conditions are Two Main Fundamental Concepts of Core Programming.)
